

SecureAware® Compliance Workflow

- *Is the task of managing security-related measures taking significant time?*
- *Do some employees need reminders about their information security tasks?*
- *Would you like to have a simple and effective way of documenting compliance activities?*

SecureAware Compliance Workflow helps companies to charter the progress of all work associated with information security and provides you with a task management system directly linked to your Information Security Handbook.

Correct delegation of responsibilities results in correctly maintained information security. SecureAware Compliance workflow makes it easy for you to delegate responsibilities and monitor task progress. The module provides automatic reports and will bring any gaps in your security programme to your immediate attention.

SecureAware Compliance Workflow is a powerful and flexible tool with many possible areas of application. Automate tasks which reoccur weekly, monthly or annually – for example, authorisation of security documentation (with SecureAware Policy), registration of completed security tasks and associated report compilation, BCP testing (with SecureAware BCP), notification upon commencement, deadline overrun, and completion of tasks.

Business benefits:

- ✓ Peace of mind: Know that your IT security tasks are being carried out
- ✓ Security: closes the gap between policy and reality
- ✓ Clarity: Any shortcomings are instantly highlighted
- ✓ Smoother auditing: View and document all activities point-for-point in relation to your IT Security Handbook
- ✓ Optimised efficiency: Collate, structure and document your IT security tasks
- ✓ A component of SecureAware – relied upon world-wide
- ✓ Security: An ISO27001-certified supplier

Neupart, an ISO 27001 certified company, is the leading provider of IT GRC management solutions. Neupart helps enterprises manage complex regulatory mandates and risks with an all-in-one platform for compliance, best practices and awareness.
