

# SecureAware Compliance Analysis 2

- ❓ *Is it time consuming to conduct internal audits?*
- ❓ *Would you like a simple way of documenting your compliance level in relation to your own policies, to ISO27002, to PCI DSS, or another standard?*
- ❓ *Is using spread sheets to manage security assessments policy difficult and resource-intensive?*

With SecureAware Compliance Analysis 2, determining your company's level of compliance in respect to any security standard is simple.

Criteria questionnaires for PCI, ISO27002 and maturity checks are included and any other standard can be imported or created. The module facilitates creation of your own questionnaires based upon your company-specific policies, rules or procedures.

SecureAware Compliance Analysis 2 enables you to set the exact parameters of your compliance check. Select only specific sections or policies for inclusion, and determine which employees you wish to complete the benchmarks. You control who can read the automatically generated compliance and audit reports, and you can tailor the layout to match your specific requirements.
