

SecureAware

Compliance and Risk Management Solution

Neupart provides an integrated solution that addresses all requirements organizations have for IT Governance, Risk and Compliance Management (GRC):

- ISO/IEC 27001, Payment Card Industry Data Security Standard (PCI DSS) and COBIT IT Governance framework, WLA SCS, and others.
- Policy Management, including capabilities to build, manage and communicate security policies to relevant staff and subcontractors.
- Policy agreement tools: Know that staff has read your policies.
- Integrated Security Awareness: Communicate policies to staff and document the knowledge level of your organization on different topics. Measurements for best practice and policy specific knowledge measurements are included.
- Risk Management: Link corporate business processes with systems or applications and perform best practices risk management on the assets that matters the most to the enterprise. Business
- Continuity Planning allows organizations to keep business continuity plans always up to date and always available.

Solution Overview

Solution details

POLICY: Rapid creation of ISO 27001, Sarbanes-Oxley, and PCI DSS compliant policies. A policy generated in SecureAware can be disseminated to all end users via the local intranet. Your policies can be mapped with any standard or requirement set.

AWARENESS: Document awareness and policy knowledge. Targeted, on-demand education allows you to improve user awareness only in areas where it is needed. Automated end user quizzes based on your policies. This provides you with the peace of mind that your users know and follow your policies.

RISK: Manages your risk according to best practices and allows you to focus constrained resources on the valuable assets and actual threats that represent the most significant risk to the enterprise.

COMPLIANCE: Allows you to rapidly get an overview of your compliance with PCI DSS, Sarbanes Oxley, ISO 27001, COBIT 4.1, and other standards or regulations.

Establishes overview of your policy-to-reality gap.

Automates recurring activities, such as Plan-Do-Check-Act tasks. You can delegate and assign tasks and consolidate all the status replies in your compliance reports. You can build a strategy towards standards-based, "future-proof" compliance and also achieve ISO 27001 certification.

BCP: Make your business continuity plans available, alive and always up to date. SecureAware BCP provides structures and content to increase your disaster preparedness.

Achieve continuous compliance

Benefits
