

SecureAware Risk TNG.

- ❓ Are spreadsheets unfit for risk assessments?
- ❓ Do you need continuous insight to your current risk level?
- ❓ Do you want to spend less time on risk management?
- ❓ Do you want assurance that relevant threats are being considered?

Risk TNG is the next generation risk management tool from Neupart. Based on the real life experiences of risk management professionals, Risk TNG offers a wide range of ease to use features, including:

- 🔗 **Asset Inventory** for any asset type, including 'BIA-friendly' assets, such as IT services and business processes, as well as tangible assets such as servers and facilities.
- 🔗 Structured, global **threat catalogue** to manage relevance and frequencies of threats.
- 🔗 Business Impact Assessments, security control assessments and probability assessments at **quick or detailed assessment** levels.
- 🔗 **Web services API** allows for integration and data exchange with your other applications

- ✅ Know your IT business risks
- ✅ Very intuitive GUI for any user involved in assessing your IT related risks
- ✅ Fast results
- ✅ Saves time for you and your organization
- ✅ ISO 27005 based methodology – and fully compatible with NIST SP800-30
- ✅ Less specialist knowledge needed to conduct professional risk management
- ✅ Delivered as a service or on-premise installation

Risk TNG offers you several responsible short-cuts to reduce your time spent or to cut your risk management costs. We reduce the number of questions you'll need to assess by linking relevant threats with your asset types. To further reduce the number of needed interviews, Risk TNG uses risk metric inheritance from dependent assets. So now you can also assess your business processes, IT services, vendors, systems as well as the usual more tangible assets such as logical and physical servers, data centers, etc.

Neupart, an ISO 27001 certified company, provides an all-in-one IT GRC solution allowing organizations to achieve continuous compliance by automating activities for IT governance, risk management and compliance management. Whether you need to comply with PCI DSS, ISO 27001, Sarbanes-Oxley, WLA SCS, or manage evolving business risks, Neupart allows you to respond effectively and "future proof" your compliance program. More than 300 organizations worldwide are using SecureAware from Neupart, including governments, utilities, banks and insurance firms, IT Service providers and lotteries. www.neupart.com
